

PUBLIC SECTOR ASSET MANAGEMENT

SERVICES

At Rockies Property Group (RPG), we are in pursuit of improvements and efficiencies in the governance of public real estate assets.

Through the strategic management of public real estate assets, we look for opportunities to enhance Council members' and Administration's ability to achieve their stated policies and strategic plans.

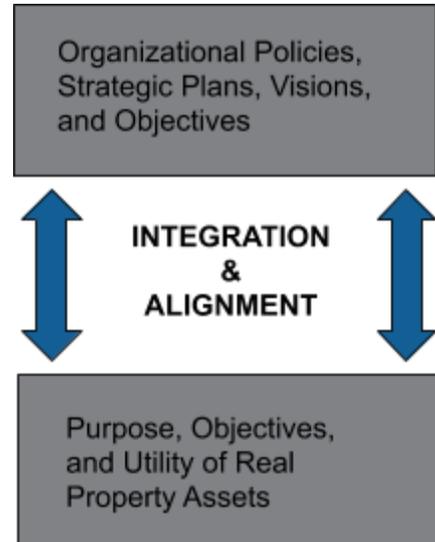

Our guiding philosophy is that each public real estate property purposefully serves the public interest and fully aligns with Council's led-directives and the municipality's strategic growth plans.

To achieve optimal performance and utilization of public real estate assets, Rockies Property Group evaluates the performance of public sector real estate through consultation with stakeholders and end-users. Additionally, we consult with stakeholders to establish key performance indicators for each public real estate asset while accounting for economic, social, spiritual, and political factors.

On a micro-level, a comprehensive analysis is performed on individual public real estate assets to assess its existing purpose and utilization level; and to further evaluate whether the existing costs to maintain and to operate the asset may be achieved in a more economically sustainable manner.

With RPG's in-depth analysis and recommendations, public sectors will be empowered:

1. To implement efficiencies in the governance of public real estate assets;
2. To uncover the highest and best use of each asset;
3. To strategically position each public asset to best serve and advance the public's interest.

ABOUT US

Rockies Property Group consists of seasoned commercial real estate professionals with experience in both the public and private sectors, and in facets of commercial real estate including transactional brokerage, property management, assessment and taxation, and appraisal.

The RPG team is founded on the vision of providing transparency and accountability in public sector real estate management; and we are in the pursuit of identifying gaps/areas of improvement, designing innovative solutions, and driving sustainable long-term growth.
